

What's New for 2008

- Welcome to Booth #1907, coincidentally the year of our company's founding. Thank you for your business as we commence our second century.
- Welcome aboard to our newest team member:
 - Jonathan Hernandez – Director of Engineering/Solaire Production
- Rasmussen has led the market in alternatives to gas logs, starting almost 30 years ago with FireBalls. In recognition of our continued growth in this segment, we have created a separate brand name for our various options of FireBalls, FireShapes and FireStones:

New for **ALTERNA™** Contemporary Gas Fires:

- FireGlitter™ - Glass, Flame and Stainless Steel (also in Black), certified to vent-free and vented standards. Use with our 5 glass colors, you own, or no glass ("FireLine").
- Double-Face **ALTERNA™** VF FireBalls, FireShapes and FireStones for See-Through Fireplaces. Double-Face FireGlitter soon. Stainless Steel and Black chassis.
- Glass, in 10 lb. bags, in five distinct colors: Black, Copper, Blue/Green, Cobalt Blue and Platinum. Use ¾" thick layer as a topper on the sand/ash of our various burners to enhance the contemporary look of our vented FireBalls, FireShapes and FireStones.

New for **ALTERNA™** and vented pan burner systems:

- "EASY" control system - the receiver/battery pack: (1) has a three position switch (OFF/REMOTE/ON), permitting the set to be operated without a remote; and (2) is universal – it can be used with all remote of our remote options.
- Stainless Steel Front with tubular legs to convert our Custom Pan Burner (the first pan-type burner on the market, created by T.R. Rasmussen in 1958) into a contemporary look.
- Stand-alone Crackler sound generator in Log House.
- Display Racks with Rasmussen and **ALTERNA™** logos. Ask for special "Display Rack Deal".
- New DF-CXF vented burner for see-through fireplaces. Use with DF Grate or as a floor-level burner for **ALTERNA™** FireBalls, FireShapes and FireStones that is 16" deep. Easy installation, great flames.

New for Solaire Infrared Grills:

- Colored Stainless Steel for grills and island accessories. Grill shown in booth has been specially engineered to accommodate a coloration process that will not discolor from heat. Color options to be available are numerous, including custom colors. Color items to be special ordered, with 4 to 6 week lead times.
- Island Accessories – Drawers (in wide and narrow, shallow and deep, two and three drawer sets); Flush Mount Doors; Trash pullout; and Paper Towel Holder.
- Refrigerated units: Single door refrigerator; Two and Three Drawer units; and Beer Cooler.
- Accessory Propane Tank Pullout for cart models.
- Hot Wire ignition – battery powered with valve switches.
- Grilling Light – LED; battery operated; mounted on standard Solaire rotisserie motor bracket; adjustable to put the light where you want it - not in your eyes!
